2. Controlling Risks and Implementing Measures

Topic Overview: Once hazards are identified, implementing control measures is critical. The hierarchy of controls—elimination, substitution, engineering controls, administrative controls, and PPE—is central to this process. Sample Question: Order the following control measures from most effective to least effective: PPE, engineering controls, administrative controls, elimination. Answer: Most effective to least effective: 1.

Elimination – removing the hazard entirely. 2. Substitution – replacing the hazard with something safer. 3. Engineering controls – designing physical safeguards (e.g., guards, barriers). 4. Administrative controls – policies, procedures, signage. 5. Personal Protective Equipment (PPE) – gloves, helmets, respirators. responsibilities are clearly defined, and everyone understands their role. Candidates should appreciate the importance of leadership and communication in fostering safety compliance.

4. Incident Investigation and Reporting

Topic Overview: Understanding how to analyze incidents helps prevent future occurrences. This involves systematic investigation, root cause analysis, and corrective action implementation. Sample Question: What are the main steps in investigating a workplace incident? Answer: Main steps include: - Secure the scene: Ensure safety and prevent further incidents. - Gather evidence: Collect physical evidence, photographs, and witness statements. - Analyze causes: Identify immediate causes and underlying root causes. - Develop corrective actions: Prevent recurrence through policy or process changes. - Document and report: Record findings and communicate with relevant authorities.
