Questions & Answers About intermediate accounting chapter 17 investments test bank

No	Question	Answer
1	What are the key differences between debt and equity investments as covered in Chapter 17 of intermediate accounting?	Debt investments typically involve a creditor-debtor relationship and are recorded at amortized cost, whereas equity investments represent ownership in another company and are often recorded at fair value with changes recognized through other comprehensive income or net income, depending on the classification.

2	How is the fair value measurement of investments handled in Chapter 17, and what are the main categories of investment securities?	Investments are measured at fair value on the balance sheet, with securities classified as held-to-maturity, trading, or available-for-sale. Held-to-maturity securities are recorded at amortized cost, trading securities are marked to fair value through net income, and available-for-sale securities are recorded at fair value with unrealized gains or losses reported in other comprehensive income.
3	What accounting treatments are applied to unrealized gains and losses on investment securities according to Chapter 17?	Unrealized gains and losses on trading securities are included in net income, while those on available-for-sale securities are reported in other comprehensive income until realized. Held-to-maturity securities do not have unrealized gains or losses as they are carried at amortized cost.
4	How does Chapter 17 address the impairment of investments, and what steps should be taken when impairment is recognized?	If an investment's fair value declines below its amortized cost and the decline is deemed other-than-temporary, an impairment loss must be recognized in net income. The investment's carrying amount is written down to its fair value, and future recoveries are not recognized if impairment is considered permanent.

5	What disclosures are required for investments in securities under Chapter 17 of intermediate accounting?	Disclosures include the classification of investments, fair value of investments, unrealized gains and losses, any impairment losses recognized, and the nature of the investments (e.g., trading, available-for-sale, held-to-maturity), as well as the methods used to determine fair value.
