What Is Soiling?

Soiling, medically known as encopresis, refers to the involuntary or intentional passage of stool outside the toilet, often accompanied by accidents or leakage. It frequently occurs in children who are past

the age of toilet training but still struggle with bowel control.

2. Toilet training issues: Anxiety or resistance towards toilet use can cause withholding behaviors.
3. Medical conditions: Such as neurological disorders or anatomical issues.
4. Psychological factors: Stress, anxiety, or emotional disturbances.
5. Poor toileting habits: Infrequent bathroom visits or improper positioning.
