Step 4: Risk Management and Position Sizing

Step 6: Review and Improve

- Maintain a trading journal documenting every trade. - Analyze wins and losses to identify patterns. - Adjust strategies based on performance metrics and market changes. Technical Tools and Indicators in Marcel Link's Strategy While no single indicator guarantees success, Marcel Link advocates using a combination of tools to improve probability. Popular Technical Tools - Moving Averages (MA): To identify trend direction. - Relative Strength Index (RSI): To assess overbought/oversold conditions. - Volume: To confirm breakouts or reversals. - MACD: To detect momentum shifts. - Fibonacci Retracements: To identify key support and resistance levels. Pattern Recognition Techniques - Breakouts: Trading on confirmed breakouts above resistance or below support. - Pullbacks: Entering after a retracement within a trend. - Reversals: Identifying potential trend turns through candlestick patterns. Ignoring Risk Management - Moving stops prematurely or risking too much can wipe out gains. - Solution: Stick to predefined risk parameters. 3. Chasing the Market

- Entering trades after significant moves are already underway reduces probability. - Solution: Wait for confirmation and avoid FOMO (Fear of Missing Out). 4. Not Adapting to Market Conditions - Rigid strategies that don't account for changing volatility or trend shifts. - Solution: Regularly review and adjust strategies as needed. Case Study: Applying Marcel Link's Strategy in a Live Market Let's consider a hypothetical example to illustrate his approach. Scenario Summary: - Market: Stock XYZ trending upwards. - Timeframe: Daily chart. - Setup: Price pulls back to a 50-day moving average, forming a bullish engulfing candle after a minor retracement. - Volume: Spikes on the breakout candle. - Entry: Buy at the close of the engulfing candle. - Stop-Loss: Below recent swing low. - Profit Target: 2:1 reward-to-risk ratio. Execution: - Confirmed trend and pullback. - Entry only after multiple signals aligned. - Risk managed per predefined parameters. - Trailing stop once the trade moves favorably. - Exit at target or if signs of reversal appear. This example demonstrates how Marcel Link's principles can be practically applied, emphasizing patience, confirmation, and disciplined risk management.
