The Goal of Corporate Financial Management

At the heart of the **principles of corporate finance 6th edition** lies the primary goal of maximizing shareholder wealth. This goal guides strategic financial decisions and influences the way firms allocate resources. The core principles include:

- Maximizing Shareholder Value: Ensuring that investment decisions lead to increased stock prices.
- Balancing Risk and Return: Making informed choices that optimize expected returns relative to associated risks.
- Ensuring Financial Flexibility: Maintaining the ability to respond to unforeseen financial needs.
- Maintaining Liquidity: Ensuring sufficient cash flow to meet operational and strategic commitments.

Time Value of Money (TVM)

One of the foundational concepts in corporate finance, the time value of money, underpins many other principles. It reflects the idea that a dollar today is worth more than a dollar in the future due to potential earning capacity. Key components include:

- Present value (PV) - Future value (FV)
- Discount rates - Compounding and discounting techniques

financing decisions.

counter (OTC) markets
