Definition and Purpose

- Language learners aiming for accurate pronunciation
- Linguists studying speech patterns
- Speech therapists diagnosing and treating speech disorders
- Actors and singers practicing pronunciation

Types of Phonetic Transcription

There are primarily two types of phonetic transcription systems:

1. Broad transcription: Provides a general idea of pronunciation, often omitting minor variations.
2. Narrow transcription: Offers detailed, precise representation including specific articulatory features.

The most widely used system is the International Phonetic Alphabet (IPA), which standardizes symbols for all speech sounds across languages.
