Understanding the Rubber Guard: An Introduction

What Is the Rubber Guard?

The rubber guard is a dynamic, flexible guard position that allows the practitioner to control their opponent from the top while maintaining a high degree of mobility and threat of submissions. Unlike traditional closed or open guard, the rubber guard emphasizes a deep, over-the-face control using the legs and arms to manipulate the opponent's posture and limit their options.

Origins and Evolution

Developed and popularized by Eddie Bravo, the rubber guard emerged from his exploration of no-gi BJJ techniques, blending elements of traditional guard with innovative control positions. Its evolution has been influenced by cross-training with other grappling arts and a focus on fluid transitions rather than static positions.

Core Principles Behind Eddie Bravo's Mastery of the Rubber Guard

Flexibility and Mobility

Eddie Bravo advocates for a high level of flexibility, especially in the hips and legs, to effectively execute and maintain the rubber guard. This flexibility allows for deep over-the-face controls and complex submissions.

Control and Pressure

The rubber guard is designed to limit the opponent's movements by controlling their posture and head position. Maintaining constant pressure enables the practitioner to set up submissions or transitions.

Flow and Transition

Bravo emphasizes smooth transitions between different guard positions and submissions, making it difficult for opponents to anticipate or counter his moves.

Key Techniques and Variations of the Rubber Guard

The De La Riva Position

A foundational position where the practitioner uses their leg to control the opponent's arm or head, setting up submissions like the triangle choke or omoplata.

The Mission Control

A versatile position where the practitioner hooks their foot around the opponent's arm or head, creating opportunities for chokes, armbars, and sweeps.

Chokes from the Rubber Guard

Some of the most effective submissions include:

1. **Triangle Choke** — Using the legs to encircle the opponent's neck and arm.
2. **Guillotine Choke** — From deep over-the-face control to finish the opponent's posture.
3. **Bow and Arrow Choke** — A gi choke adapted for no-gi scenarios, leveraging the rubber guard's control points.

Transitions and Sweeps

The rubber guard enables fluid transitions to dominant positions such as mount or back control, as well as sweeps that can reverse the position.

Eddie Bravo's Training Methodology for Mastering the Rubber Guard

Bravo incorporates yoga, stretching, and mobility drills to enhance flexibility, which is crucial for executing deep rubber guard positions comfortably and effectively.

Challenges and Common Mistakes in Mastering the Rubber Guard

Over-Reliance on Flexibility

While flexibility is vital, relying solely on it without proper technique and strength can lead to positional vulnerabilities.

Neglecting Defense

Focusing only on offense from the rubber guard can leave openings for sweeps or submissions if not balanced with proper defensive awareness.

Improper Posture and Base

Maintaining a solid base and posture is crucial; collapsing or losing balance can give opponents opportunities to pass or submit.

Failure to Transition

Sticking rigidly to one position without fluid transitions can make your game predictable and easier to counter.

Introduction to Eddie Bravo and the Rubber Guard

Who is Eddie Bravo?

Eddie Bravo is a renowned Brazilian Jiu-Jitsu black belt, founder of 10th Planet Jiu-Jitsu, and a pioneer of no-gi grappling. Known for his innovative approach and unorthodox techniques, Bravo challenged traditional BJJ paradigms with his focus on flexibility, dynamic movement, and positional control. His most notable contribution is the development of the rubber guard, a positional system designed to create space, control the opponent, and set up submissions from the top position.

What is the Rubber Guard?

The rubber guard is a system of controlling an opponent from the closed or open guard that emphasizes flexibility, leverage, and constant threat creation. Unlike traditional guard systems that rely heavily on grips and pressure, the rubber guard utilizes high-level flexibility to elevate the opponent's posture, isolate limbs, and set up submissions such as the triangle choke, omoplata, or guillotine. It's characterized by a deep, flexible position that resembles a "rubber band" — hence the name — allowing for fluid transitions and unpredictable attacks.

The Core Principles of the Rubber Guard

Before diving into specific techniques, it's essential to understand the fundamental principles that underpin Eddie Bravo's rubber guard system:

1. Flexibility and Mobility

The rubber guard heavily depends on hip and hamstring flexibility. Regular stretching and mobility drills are necessary to achieve the positions required for effective control and submissions.

1. Control and Isolation

Creating space and controlling the opponent's posture are paramount. The goal is to manipulate their base and limbs to open avenues for attacks.

1. Constant Threat Creation

The rubber guard isn't just about positional control; it's a setup system that continuously threatens with submissions, forcing the opponent to defend and creating openings.

1. Dynamic Transitions

Fluid movement between positions keeps the opponent guessing. Eddie Bravo emphasizes flowing transitions rather than static holds.

Setting Up the Rubber Guard

The Starting Point: The Closed Guard

Most rubber guard techniques originate from the closed guard position, where your legs are locked around your opponent's waist. Achieving a tight closed guard is the first step, ensuring control and leverage.

Breaking Posture and Creating Space

To enter the rubber guard, you need to break your opponent's posture:

1. Use your legs and hips to elevate their head and shoulders.
2. Apply grips to control their arms or head.
3. Use your flexibility to pull them forward, creating space for your legs to come into position.

Transitioning into Rubber Guard

Once the opponent's posture is broken, and you've established control, you can transition into various rubber guard positions such as:

1. De La Riva Rubber Guard
2. Lockdown
3. Crab Ride
4. Back Step Variations

Each position offers different attack options and control dynamics.

Key Positions and Techniques in Eddie Bravo's Rubber Guard

1. The Lockdown

The lockdown is a fundamental control position that extends your leg in a prehensile way to control your opponent's leg:

1. From closed guard, thread your foot behind your opponent's far ankle.
2. Lock your foot onto your own ankle to create tension.
3. Use this position to off-balance the opponent and set up sweeps or submissions.

Uses:

1. Control the opponent's base.
2. Set up back takes, sweeps, or submissions like the sweep-to-back transition.

1. The De La Riva Rubber Guard

This variation involves a De La Riva hook combined with the rubber guard system:

1. Use the De La Riva hook on one leg to control their movement.
2. Combine with a sleeve or collar grip to manipulate their posture.
3. Allows for attacks like the triangle or omoplata.

1. The Gubber Guard (Gogoplata & Rubber Guard Hybrid)

A signature Eddie Bravo technique, the Gogoplata, is a triangle choke with the shin across the opponent's throat:

1. From rubber guard, elevate their head with your legs.

2. Thread your leg through their armpit and across their neck.
3. Lock your shin behind their head, applying pressure for the choke.

1. The Back Step

A pivotal transition that allows you to move from rubber guard to back control:

1. Use the flexibility and control established in the rubber guard.
2. Shift your hips and elevate your opponent's arm.
3. Step your leg behind their head or back to secure back control or set up submissions.

Submissions from the Rubber Guard

Mastering the rubber guard is not just about positional control but also about seamlessly transitioning into submissions. Here are some of the most effective options:

1. Triangle Choke

1. From rubber guard, elevate the opponent's head.
2. Thread your leg around their neck and lock your ankles.
3. Pull down on their head and tighten the choke.

1. Omoplata

1. Use the rubber guard to isolate the opponent's arm.
2. Swing your leg over their shoulder.
3. Finish by rolling or applying shoulder pressure.

1. Guillotine Choke

1. Use the control of the head in the rubber guard.
2. Wrap your arm around their neck.
3. Finish by squeezing and pulling up.

1. Wrist Lock and Other Submissions

1. The control positions allow for various wrist locks, shoulder locks, and cranks, depending on the situation and your flexibility.

Strategies and Tips for Mastering the Rubber Guard

1. Develop Flexibility

Consistent stretching routines targeting hamstrings, hips, and back are critical. Yoga, dynamic stretching, and specific drills can improve your range of motion.

1. Focus on Control

Positioning is everything. Practice maintaining tight control to set up attacks and prevent your opponent from passing or escaping.

1. Drill Transitions

Flow between positions to build muscle memory. Use drills like shadow grappling or specific

positional sparring to smooth out transitions.

1. Understand Your Opponent

Anticipate their reactions. A good rubber guard user keeps their opponent guessing and adapts to their movement.

1. Study Eddie Bravo's Instructionals and Matches

Review videos, seminars, and tutorials by Eddie Bravo himself to grasp subtle nuances and timing.

Common Mistakes and How to Avoid Them

1. Lack of Flexibility: Without proper flexibility, positions become uncomfortable or unachievable. Prioritize stretching.
2. Over-Reliance on Flexibility Alone: Technical control is equally important; don't just rely on flexibility.
3. Poor Posture Breaks: Failing to effectively break the opponent's posture limits your options. Practice strong grips and hip movement.
4. Neglecting Transitions: Static positions can be predictable. Work on seamless transitions to keep opponents off-balance.

Conclusion: The Evolving Art of Eddie Bravo's Rubber Guard

Mastering the rubber guard as pioneered by Eddie Bravo is a journey that combines physical flexibility, technical precision, and strategic thinking. By understanding its core principles, practicing key positions and transitions, and continually refining your control and submission setups, you can unlock a versatile and dynamic aspect of your grappling game. Whether competing or training for self-defense, integrating the rubber guard into your repertoire offers a pathway to unpredictable attacks and dominant positions — a true hallmark of Eddie Bravo's revolutionary approach to Brazilian Jiu-Jitsu.
